***Allowable Subject Matter***

1. Claims 1-13, 15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's argument filed 12/13/2010 regarding claims 1-13, 15 have been considered and are persuasive. The prior art does not disclose "a user interface description data obtaining unit obtaining user interface description data indicating names of attributes of the data structure information for which data is to be collected for said data structure" and "transmission data processing unit determining a matching relationship between an attribute name included in said data structure information and the attribute name include in said user interface description data, creating the data to be transmitted to said other device by replacing a data unit in said data structure information corresponding to the matched attribute with said attribute value, and transmitting said created data based on said access information", as required by claim 1 and a similar to the limitations of claim 13. Thus, prior art of record neither renders obvious nor anticipates the combination of claimed elements in light of the specification. After a further search and a thorough examination of the present application and in light of the prior art made of record, independent claims 1 and 13 are allowed. Dependent claims 2-12 and 15 are allowed at least by virtue of their dependency from claims 1 and 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
